## ABOUT ME

---

I graduated in July 2024 with a degree in Software Engineering from Izmir University of Economics. I have a strong passion for web and mobile development and have been working as a Frontend Developer for the past year, where I gained hands-on experience building user-focused, scalable, and maintainable interfaces.

In addition to my professional experience, I worked on various web and mobile development projects throughout my academic journey, which allowed me to effectively apply theoretical knowledge to real-world scenarios and strengthen my problem-solving skills. By combining my academic background with my industry experience, I have developed a solid foundation in frontend technologies and modern development practices.

I am currently seeking full-time opportunities where I can leverage my existing experience, continue to grow as a software engineer, and contribute to impactful products within a collaborative development environment.
